Attn: Current or potential flood victims

Due to the flooding through the Brisbane area we would like to let you know we are here to help in any way we can. In the aftermath when we are ready to get back to work it is likely that some IT companies (possibly yours) will be overwhelmed with work, and therefore unable to get your IT back-up an operational within desired timeframes. With offices in Brisbane and on the Gold Coast we are capable of helping when you need it the most, we may even bring in staff from our Townsville site to assist if necessary. Whether it is to:

- look at PC's that don't appear to be switching on after being moved
- set-up your servers
- getting PC's back on the network
- getting peripheral devices (printers, scanners, etc.) re-connected to your network
- write insurance letters for damaged equipment

As a business with a sense of corporate responsibility we would like to help a little more. **For every hour used by businesses affected by the floods we will donate \$20 to the Premiers Flood Relief Appeal.** If you would like information on what you can do to best protect your IT equipment for the floods refer to our Facebook page's wall
